### **RULING ON ENTITLEMENT**<sup>1</sup>

On March 22, 2021, Antonio Jackson filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*<sup>2</sup> (the “Vaccine Act”). Petitioner alleges that he suffered a left-sided shoulder injury related to vaccine administration (SIRVA) resulting from the tetanus diphtheria acellular pertussis (Tdap) vaccination he received on March 7, 2019. Petition at 1. Petitioner further alleges that the vaccination was administered within the United States, he experienced symptoms in excess of six months, and he has not received any compensation in the form of an award or settlement for his vaccine-related injuries, nor has he filed a civil action prior to filing his petition. Petition at 1, 10. The case was assigned to the Special Processing Unit of the Office of Special Masters.

On December 7, 2022, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent's Rule 4(c) Report at 1. Specifically, Respondent determined that "[P]etitioner had no history of pain, inflammation, or dysfunction of his left shoulder that would explain his symptoms after vaccination; pain occurred within forty-eight hours after receipt of an intramuscular vaccination; pain was limited to the shoulder in which the vaccine was administered; and no other condition or abnormality has been identified to explain petitioner's shoulder pain." *Id.* at 4-5. Respondent further agrees that "[P]etitioner timely filed his claim . . . that he received the flu vaccine in the United States . . . and that he satisfies the statutory severity requirement by suffering the residual effects or complications of his injury for more than six months after vaccine administration . . . ." *Id.* at 5 (citations omitted).

**In view of Respondent's position and the evidence of record, I find that Petitioner is entitled to compensation.**

**IT IS SO ORDERED.**
